## Slitter Machine

[www.adakarno.ir](http://www.adakarno.ir)

- AC servo drive
- Digital web guidance (CCD headnology) / Automatic web guide control system
- Frictional Center Drive Technology
- Laser line for quick core positioning
- Shaft less 3" and 6" mechanical chucks / Independent shafted unwinders and roll pickup
- Unloading devices and splice table
- Razor blade slitting / Rotary blade slitting
- Pick up of mother reel from ground
- Load cells for web tension and diameter control
- The unloader simplifies all unloading operating
- Ability to connect a label printer to produce features and description
- Operator friendly software for easy setup of the machine
- Fully integrated operator-machine interface system with large scale display
- The SF1100 slitter machine designed for heavy duty operations and high thickness material

### Technical specifications

Speed	up to 800 m/min
Web width	up to 1600 mm
Maximum unwinder diameter	up to 1000 mm
Maximum rewinder diameter	up to 600 mm
Min slit widths	20/50 mm
Winders core diameter	76/152 mm
